RODRIGO COLOMA GUTIÉRREZ

Data Engineer | Senior Data Scientist | ML Practitioner

rjcolgut@gmail.com · +34 691 668 700 · Madrid · https://www.linkedin.com/in/rcoloma · https://github.com/Rodrigo-Coloma · Spain

RESUMEN PROFESIONAL

Nine years building data systems and ML solutions across commercial and research environments. Work covers cloud data architecture on Azure and Databricks, production ML with Scikit-Learn, XGBoost, and PyTorch, BI development in Power BI, and more recently LLM applications. Background in pharmacy and laboratory science, which helps with domain-heavy datasets but doesn't define the work. Currently managing a data engineering at Grupo Ilunion.

COMPETENCIAS CLAVE

Data Engineering & Architecture: ETL Pipelines, Data Modeling, Data Warehousing, Azure Data Factory, Databricks, PySpark, Azure

Machine Learning & AI: Scikit-Learn, XGBoost, PyTorch, MLflow, Predictive Modeling, LLM Applications, Agentic AI, Model Deployment, Feature Engineering, Hyperparameter Tuning

Programming & Analytics: Python, SQL, Forecasting, Segmentation, A/B Testing, Statistical Modeling, Biostatistics

Business Intelligence: Power BI, Advanced DAX, Power Query, Dashboard Development, Data Visualization, Reporting Automation

Leadership & Strategy: Team Leadership, Stakeholder Management, Data Strategy, Agile Delivery, KPI Frameworks

EXPERIENCIA PROFESIONAL

Grupo Ilunion
Jan 2026 – Present

Data Team Lead

- Designed and built the cloud data architecture for the corporate analytics division on Azure and Databricks
- Shipped 2 LLM-based applications to production — handled the full build from architecture to deployment to monitoring
- Managing delivery of 4 high-priority Power BI data products while keeping engineering standards consistent across the team

Ilunion Hotels
Aug 2024 – Dec 2025

Senior Data Analyst / Data Scientist

- Built and deployed 5+ ML models in production using Scikit-Learn, XGBoost, and PyTorch — revenue forecasting, demand modelling, customer segmentation
- Improved a core forecasting model's accuracy by 5% through targeted feature engineering and hyperparameter tuning
- Maintained 50+ Power BI reports with advanced DAX and SQL, including automated refresh pipelines and Power Query transformations

Macrogen
May 2022 – Jul 2024

Data Analyst & Laboratory Director

- Built the company's entire data stack from scratch — data warehouse design, ETL pipelines, reporting layer, and the tooling decisions behind them
- Ran lab operations alongside the data build, dealing with both scientific data standards and business reporting requirements at the same time

12 de Octubre University Hospital
May 2018 – May 2022

Clinical Laboratory Specialist

- Four years of clinical data analysis across haematology, biochemistry, and microbiology — where precision in data handling is non-negotiable
- Contributed statistical analysis to 10+ peer-reviewed publications, supporting study design and results validation

EDUCACIÓN

Ironhack — Data Analytics Bootcamp 2023 – 2024

Complutense University of Madrid — Bachelor of Pharmacy 2009 – 2016
